A coordinated range of architectural  
ironmongery configurable by you, made  
exclusively in our British factory.

# sembla

## Created by you, made by Allgood

Sembla™ is a coordinated range of architectural ironmongery configurable by you.

The designers created a standard shaft or “node”, with two other components on either side of the node: the tip and the grip. An extensive selection of beautiful colours, materials, textures and finishes can be applied to the three elements, with endless possibilities.

By combining different materials and finishes, you can complement your interior design with subtle variations or striking contrasts. Our range of Ultrafabric and applied Spectra™ finishes offer a wonderful selection of colours and materials, helping you create unique pieces of ironmongery tailored to your vision.

Backed by our 25-year manufacturing warranty and made from grade 316 solid stainless steel in our British factory, Sembla shares our ‘built to last’ philosophy – meaning your creative vision will stand the test of time.

“

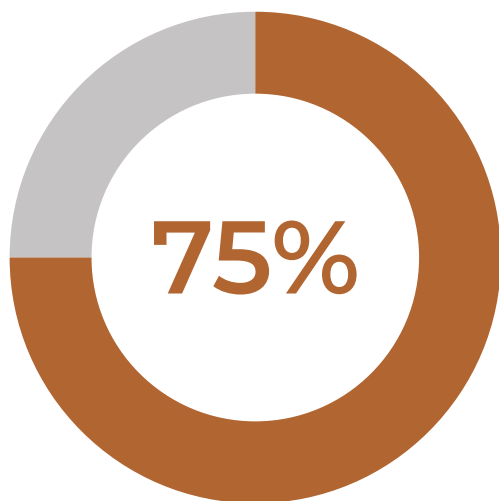

*The ability to configure Sembla is not just a playful and flexible exercise, but it also responds to the need of today’s expanded interior design palette that is both bespoke and contextual, creatively responding to client and project needs.*

Design Team

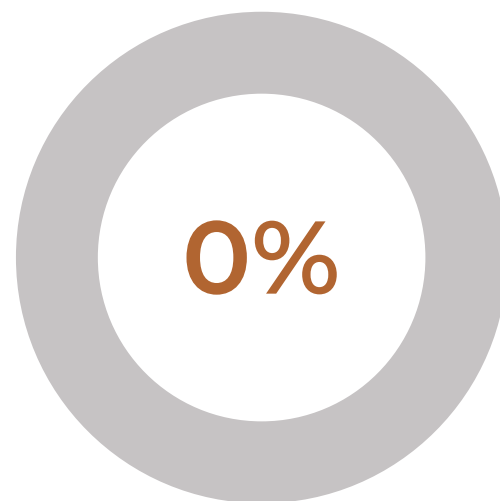

## A sustainable approach to business

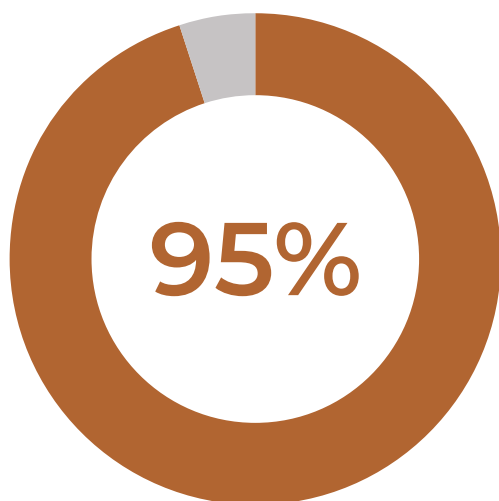

Available only from Allgood and our approved distributors, Sembla is manufactured in our Birmingham factory in the UK on the same site as our sales, technical and commercial teams because of the flexibility and quality assurance this affords. We are the only UK architectural ironmonger with in-house British production, allowing us to respond quickly and effectively to customers' needs. 75% of our suppliers are within 20 miles of the Birmingham operation, optimising logistics and minimising waste.

Operational energy use from renewable sources

Zero waste sent to landfill

Manufacturing material optimisation usage - remainder recycled

Rigorous quality control ensures <0.5% defect rate

*We offer our clients a single source for all their architectural ironmongery, access control, automation and washroom requirements.*

## Variations for you and your project

Sembla is an opportunity. An opportunity for creativity. The infinite variations allow the ironmongery to reflect and extend the building's design, complementing the aesthetic in every detail.

### Node options

**Stainless steel** (ST) – Classic, simple and timeless. The stainless steel node matches all the grip options perfectly and can also be finished in a selection of colours and finishes from the Spectra range.

**Blasted** (SS) – Tactile and striking. A textured surface that stands out in any setting and can also be finished in a selection of colours from our Spectra range.

## Grip options

Sembla includes a variety of grip options creating design freedom.

**Stainless steel** – A classic grip. Crafted from solid grade 316 stainless steel, this handle's elegant simplicity will stand the test of time.

**Knurled** – Tactile and striking. A precise geometrical cross-hatched surface which enhances grip, and gives a softer textured appearance.

**Ultrafabrics** – A world of choice. A wide range of fabrics in a variety of colours and textures, beautifully stitched on the rear of the grip.

**Wood** – A warm feel. Finished in European Oak this stylish look offers a comforting and natural aesthetic.

**Carbon fibre** – A point of difference. Providing an ultra-modern look, the carbon fibre grip makes a dynamic and sharp design statement with a technical twist.

## Spectra finishes

Spectra finishes on Sembla are available from our Colour, Tone and Tech ranges (stainless steel node only). Whatever the palette and design theme of your project, Spectra's extensive collection of colours offer many possibilities to stimulate your creativity.

Please visit our **Spectra Finishes** page for more info on decorative finishes.

**Spectra Colour** (on tip and node) – A range of powder coating options in any RAL Colour.

*There is no escaping design trends - from popular paint shades to the choice of fixtures and fittings. Sembla, with its expanded selection of finishes, gives the power of expression to the contemporary interior designer.*

**Spectra Tech** – Spectra Tech is our premium PVD vacuum coating process that results in a superior decorative finish in a range of metallic colours, in both matt and gloss; a hard-wearing solution, with excellent durability that will not fade and retains the touch and feel of steel.

**Spectra Tone** (on tip and node) – Spectra Tone applies a simulated metal finish through an electrophoretic process for those projects where satin brass, gold, black or bronze is required.

## Ultrafabrics

A world of colour. Ultrafabrics is a collection of colourful fabric finishes, designed to create unique colour schemes that will make any set of ironmongery stand out.

RG – Spectra Tech Gloss Brass with Ultrafabrics Marine Midnight  
& GM – Spectra Tech Matt Gold with Ultrafabrics Baltic

RM – Spectra Tech Matt Brass with Ultrafabrics Cabana

RAL 9023 Spectra Colour with Ultrafabrics Caribbean

BM – Spectra Tech Matt Black with Ultrafabrics Parfait

# Ultrafabrics

Select from a wide range of colours and textures to create a distinctive interior environment. To see the full range of colour options, contact your specification representative.

## Configurability

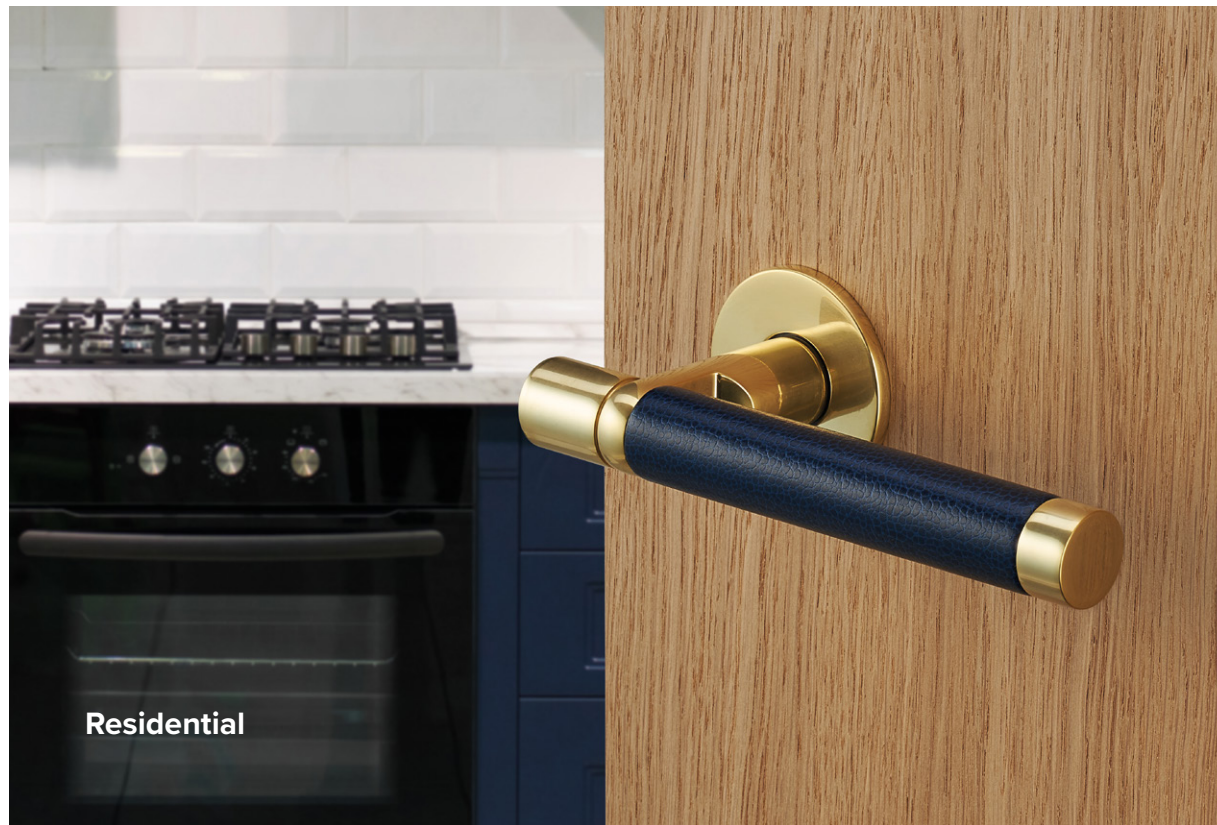

Sembla is fully configurable for many different environments, not only matching your building's desired aesthetic – but enhancing it.

Commercial

Boutique Hotel

Residential

Hospitality

## Design trends

Trends come and go, with different themes, colours and design principles every couple of years.

Sembla's configurability allows for on-trend design to match the most modern projects. Its unique combination of node, grip and tip, supported by our Spectra range of finishes, allows you to create striking designs.

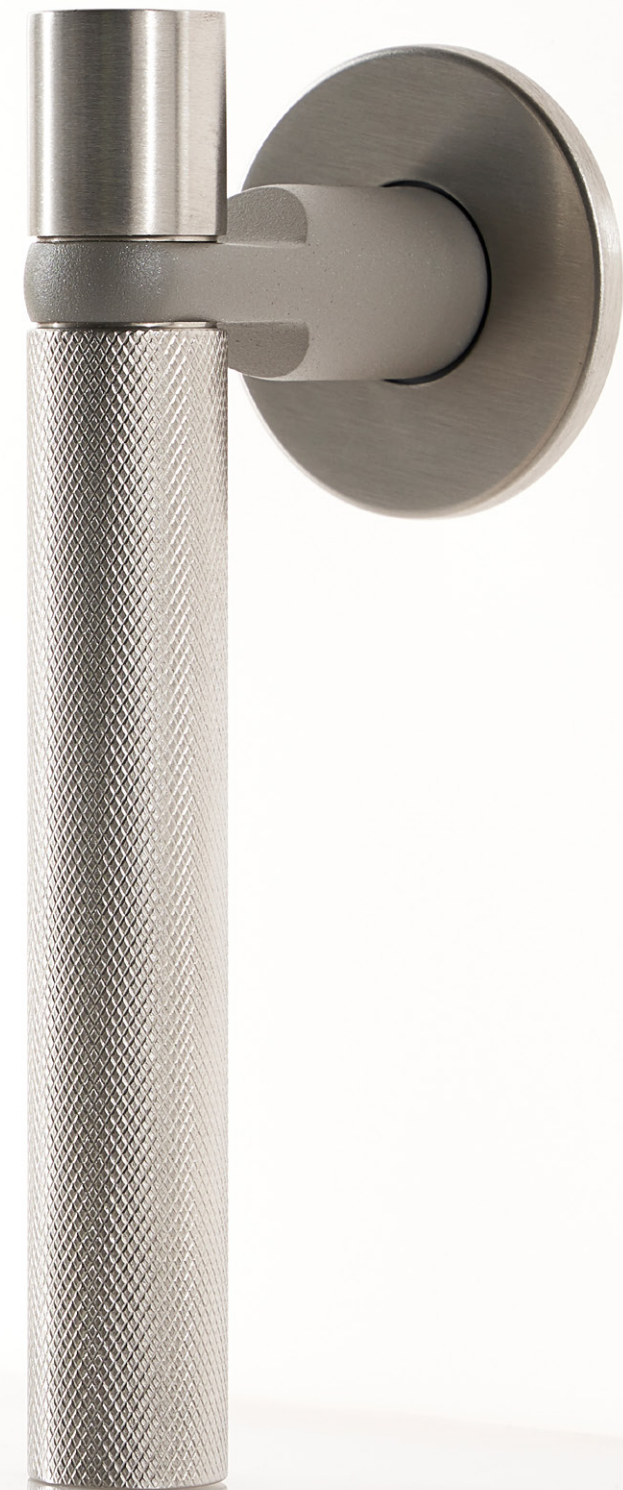

This season's trends:

- **Opulence** – This season sees the rise of opulent elements such as elegant woodgrains and classic marble effects being incorporated into interior designs.
- **Colour** – The core of many projects in recent years has been colour. Natural beiges, warm whites and soft yellows are all on trend this season – all can be achieved with an Ultrafabric finish.
